Education

Athens University of Economics and Business — Athens, Greece
B.Sc. in Informatics — *October 2022 – June 2026 — GPA: 8.65/10*

Stockholm University (Erasmus Exchange) — Stockholm, Sweden
Department of Computer Science — *January 2025 – June 2025*

Experience

Research Intern — November 2026 – December 2026
Archimedes Research Unit - Athena RC — *Athens, Greece*

- Partnering with the Hellenic Capital Market Commission to build automated NLP classification pipelines that detect and flag illegal financial advisory platforms.

Teaching Assistant — October 2026 – Present
Athens University of Economics and Business - Master's in Data Science — *Athens, Greece*

- Teaching Assistant for the course *Practical Data Science*, under Professor John Pavlopoulos.
- Conducted labs and lectures, prepared homework assignments, and graded student work.

Researcher — June 2026 – October 2026
AUEB MLH Lab — *Athens, Greece*

- **LLM Bias Detection**
  - Extended my undergraduate thesis into an ongoing research project. Identified and attributed polarization in texts to socio-demographic subgroups, then evaluated LLM alignment with subgroup-specific human judgments under default and persona-conditioned prompting.
- **Polarized Trees**
  - Developed **Polarized Trees**, a decision tree–based algorithm for identifying polyphony across socio-demographic identities, and a synthetic data generation framework for validating polarization recovery. Both are released under the same open-source Python package **PolarTox** (https://pypi.org/project/polartox/).

Technical Skills

Programming Languages: Java, Python, C/C++, SQL, JavaScript, HTML/CSS, R
ML & Data: PyTorch, Scikit-learn, NumPy, Pandas, FAISS, Elasticsearch
Frameworks & Tools: React, Flask, Android Studio, Git, Postman, REST APIs, Unix/Linux, Azure, MLflow
Languages: Greek (Native), English (C2 — Full Professional)

Projects

Machine Learning, AI & Information Retrieval — Python, PyTorch, Scikit-learn, Elasticsearch, FAISS

- **Semantic & Hybrid Information Retrieval System:** Developed an end-to-end hybrid retrieval system combining BM25, Sentence Transformers, FAISS, and hybrid re-ranking over 18,000+ documents.
- **IMDb Sentiment Analysis:** Implemented and evaluated classical (Logistic Regression, AdaBoost) and deep learning (LSTM) sentiment analysis models with custom text preprocessing pipelines.
- **TrailGame:** Developed a competitive game AI using Minimax with Alpha-Beta pruning, custom heuristics, and logical reasoning algorithms.

Software Engineering — Java, Android Studio

- **xChange:** Developed an Android marketplace app supporting peer-to-peer item exchanges, user profiles, scheduling, and offline-first data management.
- **UniWingman:** Developed a full-featured Android student platform with personalized dashboards, interactive maps, search and student utility directories, integrating a hybrid keyword-matching and RAG chatbot.

Certifications & Academic Activities

AUEB GenZ Buddies — Member, Athens, Greece — October 2026 – Present

AthNLP — Lab Teaching & Preparation Volunteer, Athens, Greece — September 2026

16th Lisbon Machine Learning School (LxMLS) — Student, Lisbon, Portugal — July 2026

Microsoft Azure Data Fundamentals (DP-900) — Certification — July 2025

Huawei Seeds for the Future — Alumnus — November 2023

Achievements

Table Tennis Player & Coach — 2010 – Present

- 3× National Champion in Singles, multiple-time National Champion in Doubles and Greek League Champion/Cup Winner with Olympiacos Team.
- Europe Trophy Winner with Olympiacos Team, 5× Balkan Championships Bronze Medalist across categories (Singles, Doubles, Teams), and Mediterranean Games Bronze Medalist in Team Event.
- Active coach since 2024, mentoring players across recreational and competitive levels.
